S O F T W A R E

Gives maintenance personnel the freedom to complete their job while in the field

Saves inspectors time on the inspection process and increases accuracy and organization

User-friendly design and intuitive workflow makes conducting inspections easier than ever

Programs

Mobile HQS

- » The new Elite Mobile HQS solution is compatible with Apple iOS and Google Android, with robust features to ensure that your inspectors can complete the HUD-52580 form efficiently and on time.

Key Features

- » Touch-to-call feature to instantly connect with landlords and residents, so inspectors can tap the phone number on file to quickly call to verify entry to the unit
- » User-defined types including annual, initial, housekeeping, etc.
- » Local data storage that syncs to the main inspections platform
- » Digital signature collection
- » Add custom checklist items to the pre-defined HUD-52580
- » Attach pictures and documents to inspections for easy retrieval
- » Schedule by address, caseworker, census tract, ZIP code, city, type of inspection, etc

Mobile Work Orders

- » The new Elite Mobile Work Orders solution is compatible with Apple iOS and Google Android, with features to ensure efficient operations out in the field.

Key Features

- » Simple, user-friendly design and intuitive workflow
- » Work order urgency color coded for easy organization
- » Keeps data for 30 days after sync as a failsafe/backup
- » Drill down capability so you can easily see the specifics of a work order
- » Track the time spent and materials used on each work order
- » Capture tenant signatures conveniently through your phone or tablet device

Work Order Touch

- » The Elite Work Order Touch product is compatible with Windows devices (Windows 8.1

and Windows 10).

Key Features

- » Simple, user-friendly design and intuitive workflow
- » Work order urgency color coded for easy organization
- » Drill down capability so you can easily see the specifics of a work order
- » Track the time spent and materials used on each work order

HQS Touch

- » The Elite HQS Touch product is compatible with Windows devices (Windows 8.1 and Windows 10).

Key Features

- » User-defined types including annual, initial, housekeeping, etc.
- » Attach pictures and document to inspections for easy retrieval
- » Predefined checklist from the standard form HUD-52580
- » Schedule by address, caseworker, census tract, ZIP code, city, type of inspection, etc

UPCS Touch

- » The Elite UPCS Inspections module is a complete inspection system designed to manage every step of the inspections process and fulfill REAC's inspection requirements. The system features a web host for scheduling and reporting, and tablet software for inspections. The module uses all pre-defined REAC-related inspections, but users can also define their own inspection criteria if they so choose. The intuitive touch-based design for the tablet offers fast inspection times, drag and drop functionality for easy scheduling and an enhanced dashboard that allows for quick updates on the inspection health of your properties.

Key Features

- » View descriptions of deficiencies while in the field
- » REAC deficiency guidelines at your finger tips
- » Create multiple types of inspections with ease
- » Mobile / tablet-ready
- » Complete inspections in the field with or without an internet connection
- » Upload results to reduce data entry
